

## Sugar Research Australia Webinars

The SRA Milling Webinar series provides milling staff with the opportunity to learn more about milling research topics, as well as discuss the information being presented, and provide input and feedback.

Every webinar is recorded and hosted on the SRA website to allow those who weren't able to participate on the day to watch the webinar later or, for those who did participate, to view it again. Each month we will present a new webinar.

*If you would like to receive email invitations for our webinar series, simply click 'Subscribe to Updates' on the home page of our website [www.sugarresearch.com.au](http://www.sugarresearch.com.au) and select the 'Milling Webinars' option.*
