

Upcoming SRA Milling Webinars

The SRA Milling Webinar series provides milling staff and other industry stakeholders with the opportunity to learn more about milling research topics and projects, and also discuss the information being presented.

It is also an opportunity to provide input and feedback. The series also allows attendees from any cane-growing region to participate without the need to travel – right from the desk in your office.

Every webinar is recorded and hosted on the SRA website to allow those who weren't able to participate on the day to watch it later or, for those who did participate, to view it again.

To join our webinars you will need a stable internet connection, headphones or speakers if you want to listen over the Internet, or a telephone (if you plan to listen via teleconference). You will also need a recent version of Adobe Flash Player.

If you would like to receive email invitations for our webinar series, simply click 'Subscribe to Updates' on the home page of our website www.sugarresearch.com.au and select the Milling Webinars option.
